

My Big Sister

• why we match the very best.

I was 8 yrs old when I met my big sister, Donna. I'm 11 yrs old now. My big sister has been here with me for a long time! I love her because she always shows me love, she's not just my "Big sister"; but she is my real family.

My sister is nice, we have the same ideas. We like spending time together. I like being with her, we always have fun & do cool things, she's the best sister in the whole world!

My sister means so much to me because she is always there for me. Like when I'm sad or when I'm happy, or when I've made accomplishments. She's there to guide me, give me advice and just listen to me. I'm thankful for my big sister, I couldn't be a Lukier Little sister!

How Having a Big Brother changed my Life.

Having a big brother changed my Life because my dad is in jail. He has been in jail since i was 5 years old. My big brother takes me places that I never got to go before, like football games and big restaurants. My brother Ryan is the nicest brother in the world and cool too. He loves sports like me and goes to all my games to support my football team! We do alot of fun things together. I Love my brother Ryan, he taught me about golf and about basketball. He used to play in college. When I grow up I want go to jail. I want to go to college and play football. I want to be just like my big brother Ryan.
